Hurricane Protection Specifications

Garden Patio Villas Association allows all types of Hurricane Protection for your villa.

Please note that all hurricane protection items outside of the villa must first be approved by the Board using our “Common Elements” form.

These are the following hurricane protection specifications:

- Roofs - Shingle or Dimensional, check with Association for the current color code.
- Storm Shutters - Aluminum, Black, Brown or White
- Impact Windows - White trimmed
- Impact Doors - Front doors must be painted with Association’s current color code.
- Reinforced Garage Doors - Dark Brown in color
- Generators - Must be placed in the back of the villa while in use.
- Fuel Storage Tanks - Must be placed in the back of the villa while in use.

Please contact the Board of Directors if there is an item you want which isn’t listed above.
